LANGUAGES

- Fluent written and spoken: English, French, Spanish
- Basic knowledge: Romanian, Russian

EDUCATION AND TRAINING

Bachelor's Degree in Computer Science 2011 *Universidad Albert Einstein, La Libertad, El Salvador*

Visual Studio .Net Programming Certification 2007 *Instituto Tecnico Centroamericano (ITCA), La Libertad, El Salvador*

WORK EXPERIENCE

Database Administration (Consulting Contracts) Jan - Dec 2025

→ Logient — Database Modernization & Azure SQL Performance

- Contributed to a large-scale modernization initiative for a legacy MySQL 5.1 environment whose continued growth had made the existing MyISAM architecture increasingly difficult to maintain and scale.
- Performed a comprehensive assessment of database structures, storage engines, table sizes, locking behavior, replication health, application dependencies, and operational risks before defining the migration strategy.
- Designed a controlled migration path from MyISAM to InnoDB, improving transactional reliability, concurrency, crash recovery, and long-term maintainability.
- Supported the creation of a parallel database environment to enable backup restoration, replication synchronization, engine conversion, validation, and controlled switchover with reduced production risk.
- Reviewed and monitored replication status, synchronization delays, table conversion progress, data consistency, and database behavior throughout the modernization process.
- Implemented corrective actions and optimization recommendations to improve response times, operational stability, and reliability across Azure-hosted SQL Server environments.

→ Revenu Québec — Database Administration & SSIS Data Integration

- Provided database administration and production support for Microsoft SQL Server environments supporting enterprise applications and operational processes.
- Performed core DBA activities including database monitoring, backup and recovery, performance analysis, storage management, access administration, maintenance planning, and incident resolution.
- Investigated database issues, analyzed root causes, and coordinated corrective actions with application, infrastructure, and technical support teams.
- Designed and developed an SSIS solution to automate the ingestion of new data into a SQL Server database.
- Built a structured data-processing workflow to receive, validate, transform, and load incoming files into the target database.
- Implemented file preparation and preprocessing steps to handle inconsistent source structures, formatting differences, and missing or incomplete column values.
- Combined SSIS native components with PowerShell and C# to support file handling, transformation logic, operational controls, and database-loading requirements.
- Developed automation for database attach and detach operations as part of the broader migration and data-processing workflow.
- Added logging, validation, error handling, and troubleshooting mechanisms to improve the reliability and traceability of the ETL process.
- Documented the SSIS solution, operational procedures, dependencies, and recovery steps to support ongoing maintenance and knowledge transfer.

Database Administrator (DBA) Jan - 2024 - Jan 2025 *Fondaction, Montréal, Québec*

- Manage and support a set of databases and tools (SQL Server 2019) as well as daily operations such as performance tuning, backup and restore strategies and failure troubleshooting.
- Maintain, deploy, and implement database servers and upgrades.
- Developed automated report generation using PowerShell and the Import-Excel module.
- Managed database backups and file system operations through PowerShell scripting.
- Worked actively with Azure for cloud-based database management.
- Implemented and optimized Power BI for reporting solutions.
- Utilized Dynatrace for database monitoring and performance analysis.
- Create, check and optimize SQL code prior to maintenance and for issues troubleshooting under technical specification or as incident investigation result.
- Document processes and procedures in Confluence.

Database Administrator (DBA) Feb 2022 – Dec 2023 *TS Imagine, Montréal, Québec*

- Manage and support a set of databases and tools (PostgreSQL 9.6 and 10, MariaDB 10.1/10.4.17, Sybase 16, Mongo 3.4) as well as daily operations such as performance tuning, backup and restore strategies and failure troubleshooting.
- Administer, support and optimize database cloud and on-premises environments.
- Support and manage RHEL and CentOS server for an extensive amount of database servers in UAT and Prod Environments (Package Installation, Roles and User privileges, Filesystem mounting, Upgrading servers and Database Engines, Database Migration, Tasks Scheduling, FTP connectivity and communication, Bash Scripting, etc.)
- Maintain, deploy, and implement database servers and upgrades.
- Load testing performance troubleshooting and tuning recommendations in conjunction with developers and system administrators
- Create, check and optimize SQL code prior to maintenance and for issues troubleshooting under technical specification or as incident investigation result.
- Deploy massive database updates on multisource and multi-region database servers (America, Europe and Asia).
- Maintain, monitor and troubleshoot replication processes on multisource and multi-region database servers.
- Document processes and procedures in Confluence.
- Perform monitoring and technical support for database internal systems and related applications.
- Collaborate with developers to automate backup and restore processes for MariaDB.
- Bash, Ruby and Python Scripting.

Database Administrator (DBA) Jan 2021 - Jan 2022 *Solutions OMD, Rosemère, Québec*

- Delivered database and infrastructure consulting services through client assignments supporting Sonepar Canada, Resolute Forest Products, and Renaud-Bray.
- Supported database environments across AWS, Microsoft Azure, and on-premises infrastructure, adapting operational practices to each client's architecture, standards, and business requirements.
- Administered and maintained business-critical database systems, focusing on availability, performance, security, capacity, and operational continuity.
- Assisted with database migrations, upgrades, backup and recovery operations, environment configuration, and production support activities.
- Investigated database and infrastructure incidents, performed root-cause analysis, and implemented corrective actions to restore and improve system stability.
- Collaborated with client development, infrastructure, operations, and project teams to resolve technical issues and support application and database requirements.
- Monitored database health, performance, storage utilization, and scheduled operations across multiple client environments.
- Prepared and maintained technical documentation covering operational procedures, environment configurations, troubleshooting steps, and recovery processes.
- Managed multiple consulting assignments while respecting each client's access controls, security requirements, operational

standards, and confidentiality obligations.

Database Administrator (DBA) Apr 2016 – Jan 2021 *Ubisoft ENTERTAINMENT*, Montréal, Québec

- Manage and support a set of databases and tools (Postgres 9.1/9.3, MySQL 5.1/5.5/5.7, MSSQL 2012/2014/2019 and MongoDB 3.6) as well as daily operations such as performance tuning, backup and restore strategies and failure troubleshooting.
- Administer, support and optimize database cloud and on-premises environments.
- Coordinate and coach technical operation staff for issue recognition, support and basic troubleshooting (instance problems, connectivity, replication, performance, space availability, log management, etc.)
- Maintain, deploy, and implement application updates to include OS upgrades, patches, and new releases.
- Collaborate with infrastructure architects, system administrators and technical teams to ensure proper integration of the environment's tools and services.
- Devops deployment using Terraform, Ansible, Rancher, Chef, Git and Python 2 and 3 (Extensive scripting using Python for clean up and data management).
- Load testing performance troubleshooting and tuning recommendations in conjunction with developers and system administrators.

Database Administrator (DBA) Aug 2015 – Jan 2016 *Nova DBA*, Brossard, Québec

- Create resources for ETL process (using SSIS) and reports (using SSRS).
- Build customer software from scratch using Oracle Apex 5.1, Oracle 11g R2, PL/SQL and Google Maps API.
- Migrate, upgrade, backup and restore databases.
- Administrate and develop resources for SQL Server 2008/2012 and Oracle 11gR2/12c.

PROFESSIONAL DEVELOPMENT Jan 2026– Current *Montréal, Québec*

- Deepened expertise in supervised/unsupervised learning, Generative AI, and Agentic AI architectures through rigorous certifications (DeepLearning.AI, Coursera, IBM).
- Strengthened Linux administration and DevOps practices through hands-on LabEx labs, ensuring reliable, production-grade system operations.

ADDITIONAL TRAINING AND WORKSHOPS

Microsoft SQL Server R2 Deployment Training (2012)
Oracle 11g R2 Database Administration Workshop (2012)
Percona MySQL Replication Introduction – Montreal, QC (2016)
TEFaQ Preparation Class – Montreal, QC (2016)
English Advanced 3 Level – Montreal, QC (2016)
MySQL Administration Training (2016) IT
Business Big Data– Montreal, QC (2017) MSSQL
Replication and H/A Training (2017) Kibana 1 and 2 Monitoring Training – Montreal, QC (2018)
Technical Writing Workshop – Montreal, QC (2018)
Master Arguments and Objections
Handling Workshop – Montreal, QC (2018)
Git/GitLab Training – Montreal, QC (2018)

MongoDB World Conference Attendance – New York, United States (2019)
Python Advanced Training – Montreal, QC (2019) C# Object Oriented Programming Training – Montreal, QC (2019)
DevOps Resources Training – Montreal, QC (2019) AWS Introduction Training – Montreal, QC (2019) DevOps Days Conference Attendance – Place Des Arts, Montreal, QC (2019)
French Writing Training – Montreal, QC (2020)
Python 3 Advanced Training – Montreal, QC (2020) PowerPoint Design Workshop – Montreal, QC (2020)
Time Management Workshop – Montreal, QC (2020) Kubecon Conference Online 2020 Attendance (2020) MongoDB Administration training in Mongo university (2021)
